

Assembly Instructions for Benches

Required Materials

- **Bench Kit from Angry Mojo Games**
- **Glue, we recommend wood glue**
- **Rubbing alcohol**
- **Rag or paper towel**

Benches are simple to make and assemble in a snap.

1. Thoroughly clean all the pieces, especially the edges, with rubbing alcohol and a rag. This is important, during the manufacturing process the laser will burn and melt the resin holding the fiberboard together and this leaves quite a bit of soot and residue. If that soot is present, glue will have a difficult time holding the piece together

2. Locate these pieces. The bench is a simple structure, with only four components.

3. Run a small line of glue on the backside edges of the bench parts as show

4. Slide the back and seat of the bench into the sides as shown. Your bench can now provide support to those mourning the dearly departed.
