Assembly Instructions for Fountains

Required Materials

- **Fountain Kit from Angry Mojo Games**
- **Glue, we recommend wood glue**
- **Rubbing alcohol**
- **Rag or paper towel**

The fountain is a bit more complicated than some of our pieces, but still not difficult.

1. Thoroughly clean all the pieces, especially the edges, with rubbing alcohol and a rag. This is important, during the manufacturing process the laser will burn and melt the resin holding the fiberboard together and this leaves quite a bit of soot and residue. If that soot is present, glue will have a difficult time holding the piece together.
2. Locate these pieces. Four of the rings are identical.

3. Run a small amount of glue above and below the slots on the center of the fountain.

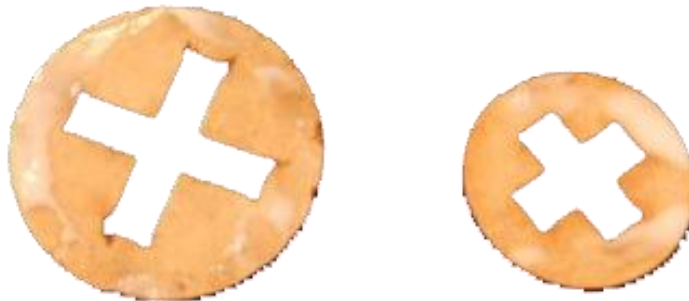

Angry Mojo Games

4. Place one slot in the other, forming a little tower.

5. Run a line of glue around the circles with the crosses in them.

6. Place the respective smaller circles on that glue.

Angry Mojo Games

7. Run a line of glue along one side of the remaining circular bits.

8. Stack them like this. By making sure the textured circles are rotated at different angles, the fountain will have a rough-cut stone look to it.

9. Glue the center of the fountain in the larger cross at the bottom. Make sure to put this on a rigid surface to ensure the center doesn't fall through.

Angry Mojo Games

10. Glue and impale the smaller assemblies on the central piece. Your fountain is now ready.
