

Assembly Instructions for Sarcophagus

Required Materials

- **Sarcophagus Kit from Angry Mojo Games**
- **Glue, we recommend wood glue**
- **Rubbing alcohol**
- **Rag or paper towel**

Being the most numerous element in the graveyard, the sarcophagi are easy to assemble

1. Thoroughly clean all the pieces, especially the edges, with rubbing alcohol and a rag. This is important, during the manufacturing process the laser will burn and melt the resin holding the fiberboard together and this leaves quite a bit of soot and residue. If that soot is present, glue will have a difficult time holding the piece together.

2. Locate the following pieces. Note the u-shaped nubbin is a different size than the one used in the large mausoleum. This one is 3/8" tall and there should be 12 of them in the box.

3. First we'll make the lid. Take the large rectangle, then spread some glue on the smaller rectangles.

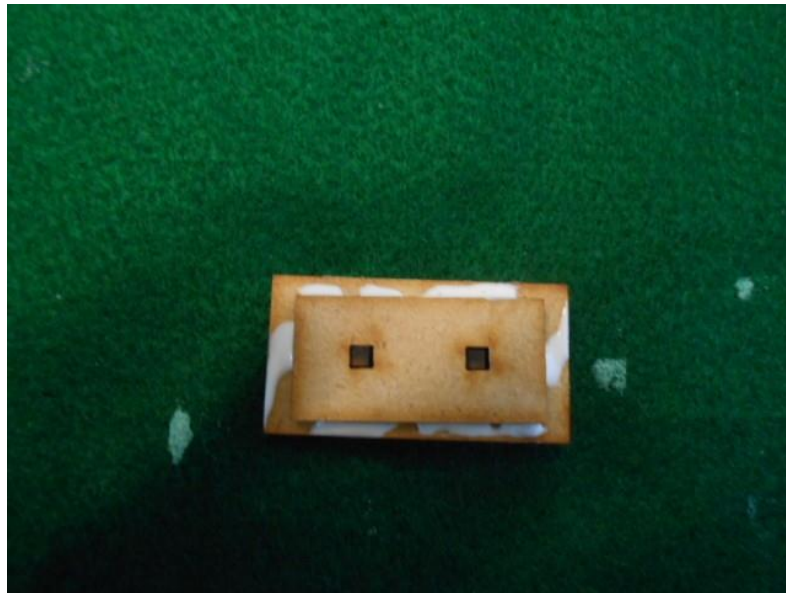

4. Slip that small, u-shaped nubbin into the large rectangle with the holes like this. It will poke out both above and beneath the large rectangle.

5. Glue the smaller rectangle with the slot in like this, the u-shaped nubbin will keep it in place.

6. Flip the assembly over and do the same thing with the other small rectangle. This should make a rectangle sandwich.

7. Run a line of glue on top of the large rectangle you can see. Make sure to get some on all four sides.

8. Glue the sides of the sarcophagus around with the tabs in the slots. It should wrap around.

9. When the glue is dried, you're done! Here lies Angry Mojo, tolerated by all.
